<p><b>KS1</b> <b>Appendix 2:</b> Pupil target grids</p>	<p><b>KS1</b> Noticing how counting in multiples of 2, 5 and 10 relates to the number of groups you have counted (introducing times tables) links to division. An understanding of the more you share between, the less each person will get (e.g. would you prefer to share these grapes between 2 people or 3 people? Why?).  Secure understanding of grouping means you count the number of groups you have made. Whereas sharing means you count the number of objects in each group.</p>
