

Year Two News

News from class 2

Happy Friday!!! What a busy, busy week we have had at school. We literally haven't had a moment to spare. At the beginning of the week we had a design and technology session, in which we designed and created a musical instrument. Then we appraised some music, discussing what genres of music we liked/disliked and then used our instruments to accompany a shaker song. We all had a lot of fun and we actually sounded very good.

In our PSHE/ICT session we began our internet safety topic. We learnt about the importance of keeping safe online and our digital footprints, this is especially relevant at the moment because the current situation requires us to be using ICT to help you with your learning. You are also living in a world where a lot of how you communicate with people, is through the use of technology. Knowing how to keep yourselves safe will help to ensure you have positive online experiences throughout your lives. #

Yesterday (Thursday) we learnt about the life cycle of a frog. We made some pin wheels that helped us with our understanding of the cycle. We then used time conjunctions to create an explanation text to explain how the cycle works. We also learnt that this process is called 'metamorphosis'. A butterfly also goes through this process, although the stages are different.

News from home

Hello to all of you working from home.

I have really enjoyed receiving your work. I can see lots of you have been working really hard on your learning. I know that Beth has been doing a lot of cosmic yoga to help her relax and keep moving, it might be worth taking a look if you want to try a different type of exercise.

We are all missing you here at school, and talk about what you are all up to. I share your learning with the children who are in and they too are very impressed with all of your work.

Keep your eyes peeled for a new learning pack online next week. Remember you need to scroll to the bottom as the top year 2 ones are from the previous lockdown. Take care and stay safe all, and I hope to continue to hear from you next week. Keep up the good work.

Miss Williams
