

Year Four News

News from class

The whole of Class 4 are hoping that you are OK and that we will all be back together in the class room soon. Until then keep working hard and remember to never give up and to remain resilient when things don't always go your way. This week we have continued to write about different Egyptian people using the social pyramid. We found out that when Egyptian soldiers were not fighting they were to oversee the peasants and slaves. In maths this week we have been looking at fractions. We talked about the difference between the numerator and the denominator and we counted up and down in tenths. Our top tip for working with fractions is that you should always start with your whole. In science this week we started to investigate sound and we used the school floor plan to locate and mark fire alarms for the whole school to hear.

What sounds were you able to hear as part of your science work?

News from home

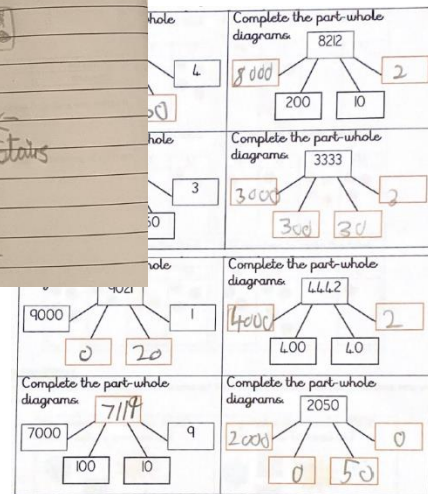

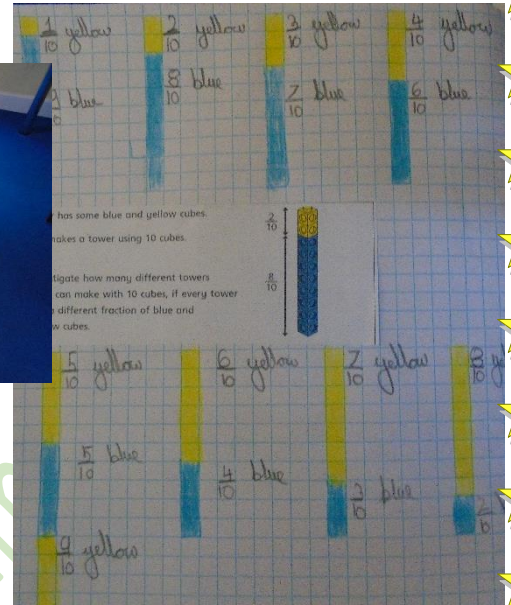

A big well done to all of the children that have sent in work this week. It has been brilliant to see a wide range of activities completed. From superb painting and designs to videos and pictures of children exercising. I have been really impressed with the presentation of peoples work as they clearly take great pride in their achievements. I am proud of all of you!

Top Learning Tips

Here are three more top tips for learning at home...

1. Make sure that you are doing something that you enjoy and interests you.
2. As well as working hard with your writing and maths it is also important to exercise and get some fresh air.
3. Stay resilient – everybody finds things hard and tricky at times. Never give up!
