

Year One News

News from class 1

Hello Class One!

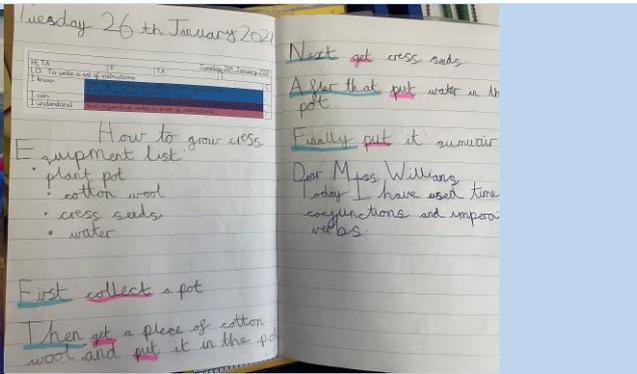

I hope you are all staying safe and well! The children really enjoy looking at your home learning photos and work. It makes us feel like we are not so far apart. Before we know it, we will be back together once again. I am saving our Great Fire of London topic for your return so do not think I have forgotten about you, that would never happen. In fact, we talk about you all every single day. We have got so many exciting things planned for your return and we can't wait to talk, learn, and have fun together again. Until then please continue to be positive and find the good in every day.

In school we have had such an exciting week. We have planted our own cress heads. We are excited to observe our ongoing experiment on where the best place to grow cress is. Some of the children have put their pots on the windowsill, others have put them inside the classroom... where do you think the best place will be? We will let you know our findings as the weeks pass. We have been looking at instructional writing, we have been learning all about imperative verbs.

We continued to work on our division and multiplication this week using a range of apparatus. This was fantastic for addressing our misconceptions and allowed us to work in different ways. We have also been practising our times tables and Elliot was able to tell us what number came after 2120 in the 10 times table! This week we are looking at statistics.

Have another wonderful week.

Lots of love Miss Edwards, Mr Brown and Class One.

News from home

Thank you to all who have kept us updated with your homelearning. Celsie has been reading every single day... I think that is fantastic news! She is such a super star. Inna and her sister Emma have been awarded with certificates by their parents for working so hard with their home learning. Isn't it great to hear some good news!?! Molly P has been enjoying her home learning, I really enjoyed reading her Frozen story. It was so lovely to hear from Ollie Pop, he has been exploring ruins of buildings to see what he can find that has historical interest and using his telescope to learn about the stars. He has also been doing a fantastic job with his mathematics. Harvey has been learning a little French and Spanish... I cannot wait for Harvey to teach us!

Class joke

Where do cows go on a Friday night?

They go to the moo-vies!

Top Learning Tips

- Each morning start your day by thinking of something you are looking forward to. This could be a hot chocolate and a movie or even a phone call. I always feel that finding something good in every single day makes you feel positive, especially in a time where every day feels the same!
